

## EVACUATING WITH YOUR PET

Think about where you will go with your pet and how you will get there if you have to leave home during an emergency. In planning for an emergency evacuation:

Arrange for family or friends outside of the affected area to shelter your pet.

Identify animal-friendly hotels/motels outside of the affected area.

Talk with your local veterinarian, boarding kennel, or grooming facility to see if they can offer safe shelter for your pet during an emergency.

Create a Go Bag for your pet or service animal (see Pet Go Bag Checklist).

Practice evacuation plans to familiarize your pet with the process and increase his/her comfort level.

Know your pet's hiding places so you can easily find him/her during an emergency.

Keep in mind a stressed pet may behave differently than normal and his/her aggression level may increase. Use a muzzle to prevent bites. Also be advised that panicked pets may try to flee.

**TIP:** Pets in carriers are allowed on MTA subways, buses, and trains. When an evacuation order is declared, pets too large for carriers will also be allowed, provided those animals are muzzled and controlled on a sturdy leash no longer than four feet. The City will announce when this policy is in effect. Bring supplies to clean up after your animal. Only legal animals will be allowed. As a reminder, service animals are always allowed.

## IF YOU ARE UNABLE TO GET HOME TO YOUR PET

Some emergencies may prevent you from returning home. In planning for such emergencies:

Identify a trusted friend, neighbor, or dog-walker to care for your pet in your absence. This person should have a set of your house keys, be familiar with your home and pet, know your emergency plan, and have your contact information.

Put stickers on the main entrances of your home to alert rescue workers to the number and types of pets inside. Update the information on the stickers every six months. Free Rescue Alert stickers can be ordered from the ASPCA.

Keep your pet's collar/harness, lease, and Go Bag in a place where it can be easily found.

## LEAVING OUR PET AT HOME

If you have no choice but to leave your pet at home:

Never leave your pet outside during an emergency.

Leave at least a three-day supply of food and water.

Consider using a large capacity self-feeder and water dispenser.

Consult your veterinarian to develop a plan for your pet's needs.

Remember to make sure all doors and windows are secure so your pet cannot escape.

Place a Rescue Alert sticker on the main entrances of your home to alert rescue workers that there are pets inside.

## PET GO BAG CHECKLIST

A current color photograph of you and your pet together (in case you are separated)

Copies of medical records that indicate dates of vaccinations and a list of medications your pet takes and why

Proof of identification and ownership, including copies of registration information, adoption papers, proof of purchase, and microchip information

Physical description of your pet, including his/her species, breed, age, sex, color, distinguishing traits, and any other vital information about characteristics and behavior

Animal first-aid kit, including flea and tick treatment and other items recommended by your veterinarian

Food, water, and dishes for at least three days

Collapsible cage or carrier

Muzzle and leash

Cotton sheet to place over the carrier to help keep your pet calm

Comforting toys or treats

Litter, litter pan, and scoop

Plaster bags for clean-up

## EMERGENCY SUPPLY KIT

Include pet supplies in your own Emergency Supply Kit – the set of supplies you need to survive in your home for at least three days.

**Pet food.** If you use wet food, make sure you have pop-up cans or a manual can opener on hand. Rotate food and water items every six months to avoid expiration.

**Water.** Dehydration is a serious health risk to animals. Check with your veterinarian to see how much water your pet needs on a daily basis.

Plastic bags, newspapers, containers, and cleaning supplies for dealing with your pet.

## PROPER IDENTIFICATION

Dogs and cats should wear collar or harness, rabies tag, and identification tag at all times. Identification tags should include your name, address, and phone number, and the phone number of an emergency contact. Dogs should also wear a license.

Talk to your veterinarian, call 311 or visit NYC.gov about microchipping your pet. A properly registered microchip enables positive identification if you and your pet are separated.

## TIPS FOR HANDLING SMALL ANIMALS DURING EMERGENCIES

### **Birds**

Transports birds in small, secure carriers.

Try to minimize temperature changes. Use a spray bottle for misting in hot weather and a hot water bottle for warming in cold weather.

Try to minimize severe changes in noise and keep the cage covered to keep your birds(s) calm.

### **Amphibians/Reptiles**

Transport reptiles in a pillowcase, cloth sack, or small carrier, and transfer the pet into a secure cage as soon as you can.

Use a spray bottle to keep pets cool and a heating pad or battery-operated heating lamp to keep pets warm.

Try to minimize changes in temperature, lighting and diet.

Do not mix species.

## **Other Small Animals**

Small pets such as hamsters, gerbils, mice, rats and guinea pigs can be transported using a covered carrier, cage, or secure box. To minimize stress, keep the carrier covered and attempt to minimize severe changes in temperature and noise.
